Product Description

Detail:

The material of the petals I use is silk. The fabric is thick and has clear lines. It is easy to shape, lifelike and will not deform for a long time.

Serrated leaf edges, clear veins, natural and vivid

The stems are natural and the leaf veins are clear, making them more agile.

Feature:

1. Moisturizing Rose

Realistic feel | clear veins | easy to shape

2. Full flower shape and wrapped in layers

The flower shape is designed with reference to the Bulgarian rose. The petals are layered and the flower shape is dense and lazy.

3. Silk material with vivid shape

Realistic and natural workmanship, large creative space and strong plasticity

4. Expert in creating versatile styles and atmosphere

The petals wrapped in layers and the delicate gradient colors replicate the beauty of nature.

5. Quickly improve the sense of spatial hierarchy

In the living room, bedroom, and study room, they are all accompanied by it quietly, which is pleasing to the eye.

Tips:

1) Simulated flower plants can be wiped clean with wet wipes, and residual moisture can be cleaned with a dry cloth.

2) Different simulated flower plants are different from flowers and green plants and are handmade products.

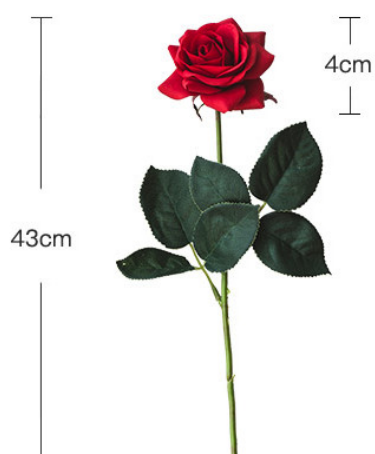

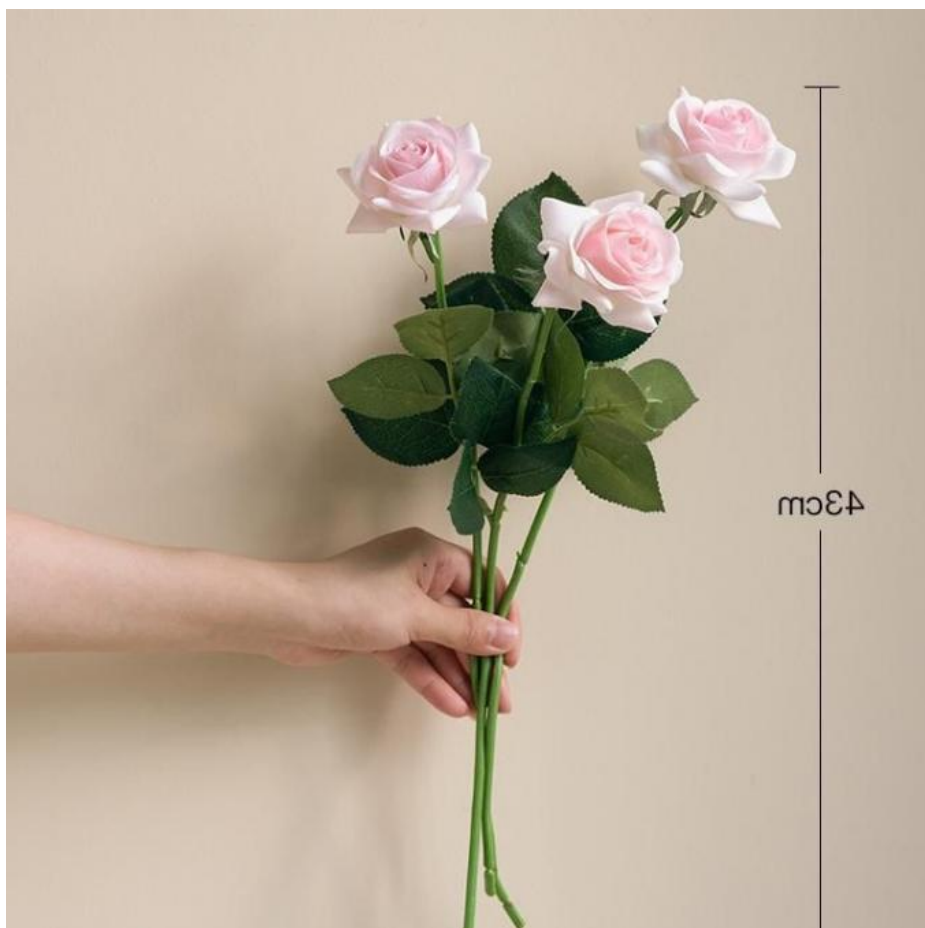

Occasionally, there may be residual glue silk cutting burrs or petals and leaves (the fallen parts can be installed back)

This is a normal phenomenon and does not affect use. Please be careful when shooting!
